Commentary

The table shows the three most deprived LSOAs in each district, together with the wards in which they are based. LSOAs that rank in the top two quintiles (0-20 and 21-40) are shaded in grey.

For example, although Adur has no wards in the top 20% most deprived, it does have three LSOAs in the top 20% most deprived pockets of deprivation are not overlooked.

This shows the importance of looking at deprivation at a granular level.
